Pupils will experiment with and apply a range of art and design skills throughout the year (outlined in the ***Progression of Disciplinary Knowledge & Skills*** below).

In the first half term of each year, pupils will build on their prior learning to hone their drawing-specific skills, as this forms the basis for all experimentation and design across each of the art disciplines. As such, they will not explore this through the lens of a specific artist.

From Autumn 2 onward, pupils will build on prior learning to explore a range of art and design disciplines, utilising the work of varying artists/designer as a vehicle for exploration. The artists/designers identified above have been selected to ensure a diverse range of media, artistic movements, and cultures, as well as being excellent models for specific knowledge, skills and concepts that the children will learn. Whilst the pupils will be inspired by the work of artists/designers, the aim is for them to create their own works of art, in which they apply the knowledge and skills that they have developed, both within a specific unit of learning and over time.
